Jan 2019 – Jun 2019 | Bangalore, India

- Built chatbots of HR Usecases using Yellow Messenger's BotPlatform.io

ACADEMIC PROJECTS

VIGNAN INFORMATION MANAGEMENT SYSTEM

Our College Portal

- A Portal with **attendance, results and leave management features with multiple roles and permissions for approvals and analytics**.
- The application was built in a way that, any **JNTU** affiliated college can use in easily.
- **Studentsfate**, one of my side projects is integrated with this application
- Built this under the guidance of our HOD and was used by our college for a while.
- [Click here for GitHub repo](#) and [Project tour](#)

VIGNANHUB

A Mini Facebook

- Tried to create an application similar to **facebook** after watching **The Social Network** movie. Got prize money of 3k for best project in the expo.
- [Click Here for website](#) and [Project tour](#)
